PROFESSIONAL SUMMARY

AI Engineer and experienced Full Stack Developer with proven expertise in LLM applications, RAG systems, AI agents, Supabase backends, FastAPI microservices, and scalable SaaS MVP delivery. I am an expert in building both cross-platform mobile applications using React Native and cross-browser web applications using the MERN stack (MongoDB, Express, React, Node.js). Proficient in JavaScript and Typescript, with a strong command of developing pixel-perfect, animated, and responsive user interfaces. I bring a rare blend of 6+ years of experience in Generative AI, LangChain, pgvector, React dashboards, and cloud deployment. I specialize in building production-ready AI systems across multiple industries, including SaaS, enterprise automation, finance, e-commerce, legal, and workflow optimization, delivering scalable, secure, and ROI-driven solutions.

WORK EXPERIENCE

BerryBoost INC. April 2024 – Onward
AI Solutions Architect — Global AI Solutions NY 10312.
USA

- Designed and developed AI-powered workflow automation platforms for clients across multiple industries.
- Built LLM-based knowledge assistants, chatbots, and customer support systems.
- Implemented document processing pipelines including OCR, classification, and vector-based search.
- Delivered end-to-end AI SaaS MVPs with secure authentication, billing, dashboards, and analytics.
- Led product strategy, architecture design, and client consultations for scalable AI solutions.
- Developed a full-stack [e.g., “AI-powered productivity / wellness / e-commerce / SaaS”] platform from concept to live product.
- Built core features including [list 3–4 key features you built, e.g., user authentication, dashboard analytics, real-time notifications, payment integration].
- Designed responsive front-end and scalable back-end architecture ensuring fast performance and smooth user experience.
- Implemented [specific technologies you used, e.g., Next.js, Supabase/PostgreSQL, Stripe, AI APIs, etc.].
- Managed complete development lifecycle as the primary/solo full-stack developer.

The MediTour Global INC. July 2022 – March 2024
Senior Technology & Operations Leader NY 10030.
USA

- Designed and developed a full-stack multi-tenant healthcare marketplace from scratch to a live, production-ready product serving hospitals, clinics, pathology labs, diagnostic centers, and other service providers.
- Built a centralized Hospital Dashboard that allows one hospital to register, manage, and staff multiple physicians, including profile management, availability calendar, shift assignment, and credential tracking.
- Implemented complete provider registration & verification system for independent entities (hospitals, clinics, labs, pharmacies, etc.) with isolated data and custom workflows.
- Developed patient-facing booking engine and physician-facing shift management system with real-time notifications and document uploads.
- Integrated Stripe Connect for payments, commission handling, and payouts; added AI-powered features (lead scoring, smart matching, credential expiry alerts).
- Tech Stack: Next.js 15, Supabase (PostgreSQL + Auth + Storage), Tailwind CSS, Stripe, Figma.
- Delivered end-to-end ownership as solo developer: UI/UX design, backend architecture, database schema, deployment, and ongoing iterations.
- Oversaw cross-functional teams in strategy, operations, HR, and technology adoption.
- Developed enterprise workflows that translated into AI automation systems.
- Led digital transformation initiatives across operational processes.
- Managed multiple high-impact projects simultaneously, ensuring timely delivery and measurable business outcomes.

TECHNICAL SKILLS

Programming Languages:	JavaScript, Typescript, Dart, Python, SQL
Web Framework:	Reactjs, Nextjs, FastAPI, LangChain, LangGraph
Mobile Framework:	React Native Expo I CLI, Flutter (Android I IOS)
Operating Systems:	MAC, Linux, Window
Source Control:	GitHub, Git Labs, Bitbucket, JIRA, Trello etc.
Tools I Editor:	Visual Studio Code, Android Studios, XCode, Postman etc.
App Publish:	Apple Store, Google Play Console
Website Deployment:	GoDaddy, NameCheap, Hostinger, Vercel, Netlify
Chat & Real-Time Communication:	WebRTC, Agora SOK, CometChatSDK (Video, Audio, Chat), Firebase, Socket.io
Push Notifications:	Firebase (FCM), OneSignal (Foreground, Background, Killed State)
Payment Gateways:	Stripe, PayPal, Braintree, Google Pay, Apple Pay, In-App Purchase
State Management:	Redux, Redux Toolkit, Redux Thunk, Redux Saga, Recoil, Context API, React Query, Flutter Bloc, Provider, Riverpod.
API Integration:	Axios, Fetch, React Query, GraphQL, Form Data, x-www-form-urlencoded, RTK Query
Localization (i18n):	RTL, LTR
Locations:	Geo-Location, Google Map, Geo Fencing, Geo-Coding.
Data Handling:	Dynamic Form Handling, ComplexJSON FormData, graphql query.
Testing:	Unit testing, Regression testing, Functional testing.
Authentication:	Firebase, social auth google, Facebook, apple, AWS amplify & Cognito auth.
AI APIs	OpenAI, Claude, Gemini
Automation	Twilio, WhatsApp API, Zapier, Make

Featured AI Projects:

1) AI-Powered Multi-Industry Virtual Assistant.
- Multilingual chatbot for customer support and task automation.
- Workflow automation across business processes.
- Document ingestion and semantic summarization.

2) RAG Knowledge Bot for Enterprises.
- Semantic search over internal documents.
- Role-based access for departments.
- Knowledge management and onboarding assistant.

3) AI SaaS MVP Platform.
- Secure login and dashboards.
- Subscription billing and usage analytics.
- File upload and vector-based retrieval.
- Cloud deployment.

4) ML-Powered Predictive Analytics Platform.
- Demand forecasting and trend analysis.
- Predictive scoring models for business processes.
- Automated reporting and dashboards.

5) Enterprise LLM Copilot for Knowledge Management.
- Internal knowledge assistant for HR, legal, finance, and operations.
- Semantic retrieval and summarization workflows.
- Admin dashboard with feedback loops.

EDUCATION

Professional Training in Cloud & DevOps | University of Toronto | Toronto, Canada — May 2025 - Expected Graduation May 2026

Certified AI/ML Specialist | University of Toronto | Toronto, Canada — May 2024 – May 2025

Master's in Business Analytics | University of South Florida | Tampa, FL, USA — January 2020 – May 2022

Bachelor in Computer Science | University of South Florida | Tampa, FL, USA — January 2017 – May 2020

RELEVANT COURSEWORK

Generative AI & Large Language Models (LLMs): GPT, Claude, fine-tuning, prompt engineering.
Machine Learning & Predictive Analytics: supervised and unsupervised ML, forecasting, lead scoring.
RAG Chatbots & Knowledge Systems: multi-document retrieval, vector search, semantic Q&A.
Supabase & PostgreSQL: authentication, row-level security, pgvector, real-time updates, storage.
AI SaaS Development: MVP architecture, dashboards, billing, analytics, production deployment.
FastAPI / Python Microservices: REST APIs, workflow automation, cloud deployment.
Frontend Development: React, Next.js, admin dashboards, user portals.
AI Agents & Workflow Automation: WhatsApp, Twilio, enterprise automation bots.
OCR & Document Intelligence: PDF ingestion, summarization, classification.
Cloud & DevOps: AWS, Azure, scalable SaaS infrastructure
Enterprise AI Automation: cross-industry workflow optimization, knowledge management, customer support bots.
Stripe Connect & Payment Systems for Marketplaces.
React Native & Flutter: Mobile App Development.
Node.js, Express & NestJS: The Complete Backend Developer Course
